The COVID-19 Pandemic has affected every single aspect of social life. Education has suffered a large impact due to the biosafety risks derived from teaching, the huge communities involved in the academic life and the inequality of the educational process.

This webinar focuses on the challenges and responses to the effects of COVID-19 in the educational process. From Asia to Europe and America the academic community has been coping with the situation with creativity, technology and new developments in learning.

This is an opportunity to learn and share with experts about problems and solutions in education in the context of the pandemic
